

Basic Search

The Basic Search Screen lets you create a search with limiters, expanders, and Boolean operators.

[View A Tutorial On This Topic >>](#)

To create a Basic Search:

1. Enter your search terms in the **Find** field on the Basic Search screen.
2. Click the **Search Options** link, if you would like to use any of the optional Limiters or Expanders. To close the **Search Options**, click the link again.

The screenshot displays the EBSCOhost Basic Search interface. At the top, there is a navigation bar with links for 'New Search', 'Publications', 'Subject Terms', 'Cited References', and 'More'. On the right side of the navigation bar are links for 'Sign In', 'Folder', 'Preferences', 'Languages', and 'Help'. The user is identified as 'Demonstration Customer'. The main search area features the EBSCOhost logo, a search input field containing 'global warming', and a 'Search' button. Below the search input field is a 'Search Options' link, which is highlighted with a red box. To the right of the search input field are links for 'Basic Search', 'Advanced Search', and 'Search History'. The 'Search Options' panel is expanded, showing various search modes and expanders. The 'Search Modes and Expanders' section includes radio buttons for 'Boolean/Phrase', 'Find all my search terms', 'Find any of my search terms', and 'SmartText Searching'. The 'Apply related words' section has a checkbox. The 'Also search within the full text of the articles' section has a checkbox. The 'Limit your results' section includes checkboxes for 'Full Text', 'References Available', 'Image Quick View Types' (with sub-options for 'Black and White Photograph', 'Color Photograph', 'Graph', and 'Map'), 'Chart', 'Diagram', 'Illustration', 'Scholarly (Peer Reviewed) Journals', 'Image Quick View', and 'Published Date' (with dropdown menus for 'Month' and 'Year'). There is also a 'Publication' input field.

3. Select a specific [search mode](#), such as "Find all of my search terms," or "SmartText Searching."
4. Apply **Limiters** such as Full Text or Publication type; or use search options that expand your search, such as "Apply related words."
5. Click the **Search** button. The Result List displays.

1 Changes in Extremely Hot Summers over the Global Land Area under Various Warming Targets.

By Wang, Lei; Huang, Jianbin; Luo, Yong; Yao, Yao; Zhao, Zongdi. PLoS ONE Jun2015, Vol. 10 Issue 6, p1-11. 11p. DOI: 10.1371/journal.pone.0130660.

Summer temperature extremes over the global land area were investigated by comparing 26 models of the 5th phase of the Coupled Model Intercomparison Project (CMIP5) with observations from the G...
